Face the risk

Existential risks are threatening the entire future of humanity.
Nick Bostrom, Alpbach 2012

Many theories imply that small reductions of risk have enormous economic impact. In practice, leaders may consider the value chain from a cost perspective as well as increases to the efficiency of the overall system. A focus on risk may create new employment opportunities and become a source of innovation and sustainability. Martin Frick introduces some risk insights and will lead through the discussion. The speakers give examples of effective risk management provided by the government (Brigitte Eder), by companies (Thomas Goiser) and by organized civil society (Sebastian Mayrgündter). Finally we will discuss new ways of thinking about risk.

PLACE

in the meadow above Böglerhof

TIME

20th August 2013, 4:15 pm

SPEAKERS

Brigitte Eder (alpS consulting, Innsbruck, t.b.c.)
Thomas Goiser (Risk Experts GmbH, Vienna)
Sebastian Mayrgündter (TIS Innovation Park, Bozen)

CHAIR

Martin Frick (Club Alpbach Vorarlberg)

'Wiesenpicknick' - what is that?

Die Alpbacher wiesenpicknicks in Tradition des Philosophen Karl Popper bieten jungen herausragenden Nachwuchsforschern eine Bühne zur Präsentation ihrer Forschungsergebnisse in Präsenz hochkarätiger internationaler Gäste, wie bereits EU-Kommissionspräsident Romano Prodi und EU-Kommissar Johannes Hahn. Neben der geistigen Nahrung ist bei den wissenschaftlichen Picknicks dank der Südtiroler Qualitätsprodukte auch für das leibliche Wohl gesorgt!
